Company Profile 2026

Skilled personnel, offshore-certified, going the extra mile for you. Screened, certificate-verified crews for offshore wind and oil & gas projects worldwide.

Built From the Deck, Not the Office

S.O.G is a forward-thinking offshore service company dedicated to empowering the offshore energy industries. The name was inspired by the maritime term "Speed Over Ground", reflecting our commitment to precision, progress and efficiency, emphasising accuracy and forward momentum.

S.O.G was founded to bridge key gaps in the offshore industry by providing tailored, comprehensive solutions that prioritise quality, safety and sustainability to meet the unique demands of each project. Our approach combines technical expertise with innovative strategies, ensuring seamless operations and zero downtime for our clients.

At S.O.G, we are not just a service provider but a trusted partner, committed to achieving excellence in every task through reliability, professionalism and a results-driven mindset.

HOW WE WORK

- Screening led by people who have worked the same decks
- Visas, travel, medicals and documents handled as one workflow
- Certificate validity tracked against every deployment window

3+ YRS

Offshore experience on installation & support vessels

15+

Offshore projects supported since 2023

7

Areas of operation: North Sea, Atlantic, Pacific, Baltic Sea, Taiwan Strait, Gulf of Mexico, Mediterranean

100%

Certificates verified against the deployment window before mobilisation

Two Sectors, One Standard

OFFSHORE WIND

Turbine technicians, deck and rigging crew, and supervisors for installation, commissioning and O&M; campaigns.

OIL & GAS

Offshore and onshore personnel for production, maintenance, workover and pipeline scopes.

Manpower & Services for Offshore Energy

From skilled personnel to reliable, specialized offshore services, S.O.G provides the support needed to keep your operations on schedule.

01

Offshore Manpower Supply

Certified technicians, supervisors, engineers, and crew for offshore wind and oil & gas projects, available for short- or long-term assignments, selected to match your project requirements.

02

Marine Crewing

We source, verify, and mobilise qualified maritime crew for service vessels, ensuring they meet your operational needs and applicable STCW and flag-state requirements.

03

Material & Equipment Supply

Sourcing and delivery of project consumables, workshop and office containers and equipment, selected to meet your operational needs.

04

Pipeline & Process Services

Technicians, supervisors and project engineers for pipeline, process and commissioning scopes, with the certifications the scope demands.

05

Artificial Lift & Workover

Specialist personnel for workover campaigns and lift operations on production assets, integrated into your existing crews and procedures.

Need a discipline you don't see?

From WTG technicians to rope access, riggers and HSE officers, tell us the role and the deployment window. We'll come back with qualified names and certificates, not just a headcount promise.

The Experience Behind the Company

S.O.G is built on hands-on offshore experience and a clear understanding of what it takes to keep projects moving. Through our direct clients, Hydrotechnik Offshore and BGS Energy Services, S.O.G has supplied personnel for offshore campaigns aboard vessels and at sites operated by the industry's tier-one contractors.

Halliburton	RWE	Van Oord	DEME	Jan De Nul	Boskalis	Eni	Skyborn
-------------	-----	----------	------	------------	----------	-----	---------

The contractors and projects referenced in this profile reflect work undertaken through HTO and BGS and should not be interpreted as direct contracts held by S.O.G.

2023	Changfang & Xidao TAIWAN Western Pacific Ocean	PSV Southern Ocean

Certified, or They Don't Sail

Offshore certifications are time-sensitive. At S.O.G we monitor validity and requirements closely, treating expiry dates as an operational risk, not an administrative detail.

GWO

All modules: working at heights, sea survival, first aid, manual handling, fire awareness.

STCW

Basic safety & security awareness, for crew status on vessels rather than passenger status.

BOSIET

OPITO-approved helicopter escape and basic offshore survival for oil & gas assets.

OGUK MEDICAL

Offshore medical, two-year validity, with Chester Step Test where turbine access is required.

Verified before mobilisation.

Every certificate is checked against the deployment window, and any crew member whose certification lapses inside the campaign period is flagged. Nobody arrives at your gangway unable to board.

Disciplines We Supply

Offshore supervisors

Offshore project engineers

WTG technicians (electrical)

WTG technicians (mechanical)

Rope access technicians

Deck crew & riggers

Marine crew (STCW)

HSE officers

Pipeline & process technicians

Inspection & maintenance

Reliable People, Ready to Mobilise

01

Built from the deck

Screening is led by people who have worked the same vessels, sites and schedules your campaign runs on.

02

Names, not headcounts

We respond with named candidates and their certificates, so you can verify before anyone mobilises.

03

One mobilisation workflow

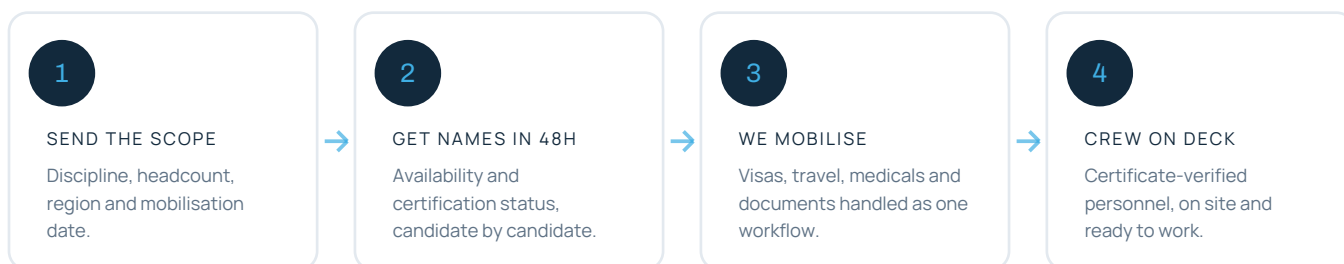

Visas, travel, medicals and documentation are handled as a single workflow, aligned to your mobilisation date.

04

Certification as risk control

Certificate validity is tracked against every deployment window, and lapses inside the campaign period are flagged early.

How an Engagement Works

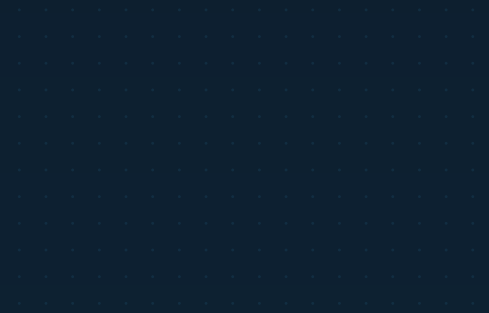

A live crew pool, not a cold database

Offshore professionals register their discipline, certifications and availability with S.O.G. When a campaign matches a profile, our crewing team contacts the candidate directly, so the shortlist you receive is current, not historical.
